Written Testimony on SB117
Repeal Legacy Generation Provisions-HB6

SB117 is long overdue. To require the citizens of Ohio to pay for dirty, expensive, and obsolete out-of state technology is costing us jobs as well as money. Senators Romanchuk and Craig deserve our praise for proposing to stop this abomination and to prevent it from happening again. If the coal plants are useful, the shareholders of the owners should finance them. We are providing welfare to a company with a five-billion-dollar annual profit.
