

Chairman Peterson, Vice chair Wilson, Ranking Member Craig and honorable members of the General Budget Committee

Thank you for the opportunity to give proponent testimony for HB218. While I am in favor of an anti discrimination bill pertaining to the Covid 19 vaccine, this bill has too many flaws. In a perfect world HB 248 was THE bill. We need a bill with simple language that is going to protect those of us choosing not to receive this vaccine as it is our Constitutional right. It's sad we need a bill at all to protect our god given freedoms. Please i am asking you to fix this bill with plain simple anti discrimination language. You may also want to look into legality if having ODH doing testing...Thank you for listening.
