

SB22

I am asking my legislature to pass SB22 and restore the balance of power in Ohio.

I have been personally harmed by the mandates put forward by Governor DeWine and ODH. I suffer from a condition where wearing a mask will likely make me visit the emergency room. My doctor kicked me out of their waiting room and terminated service with me because I can not wear a cloth mask as diagnosed by their office. They would not honor the note they wrote exempting me from wearing cloth masks.

Governor DeWine has caused irreparable harm to myself and others who can't wear masks. I have had to put off medical specialist appointments, hair appointments, and I can not enter stores, leaving my household to suffer. I contracted Covid 19 and had no doctor to follow my illness. My job is in jeopardy because days off work due to face covering symptoms, require a doctor note. I've tried to find another doctor, but I am being blackballed and denied by other doctors as soon as my records are requested. I now suffer from depression because the mandates continue with no end to mandatory masking. The activities that brought joy to my life are now nonexistent.

Health recommendations by the government should have remained recommendations. Lives of all ages have been adversely affected by heavy handed mandates against Ohio citizens. Please pass SBSB22, end mandatory masking, and send healthcare decisions back to a patient and their own doctor where they belong.
