

Ohio residents see no light at the end of the tunnel when it comes to Governor DeWine's unilateral dictates through the department of health and other state agencies. We were hopeful that the veto of SB 311 would be voted on in 2020. For whatever reason, this did not happen. He recently vetoed the Fair bill, which implies that he has no plans on relenquishing his power any time soon. His recent cerfew rollback coincides with the introduction of this legislation. He continues to distort or ignore the state data in order to present a more negative picture. The legislature has to exert it's authority as a coequal branch of our government. He could cancel all restrictions tomorrow but he could reimplement them at any time with out your approval.
