

Hello,

I am a 53 year mom of 3 and a wife. I have asthma and sarcoidosis.

My asthma has been controlled all my life with daily inhaled steroids and the OCCASSIONAL use of a rescue inhaler. My sarcoidosis has been in remission for almost 2 years.

Since I have had to wear a mask at work and while in stores my asthma has since been uncontrolled so if I get Covid I am already behind the 8 ball so to speak. And, I'm pretty sure my physician would not prescribe HCQ.

I am so frustrated because when I do go to the store without a mask, I am vilified. If individuals would like to wear a mask, go for it. But I should not have to wear a mask due to my asthma, but i will lose my job.

I strongly encourage legislators to vote YES on SB22

Carol Fischer
