

To whom it may concern,

I am sending this email to voice my opposition to SB 22. I have concerns that there haven't been voices against this bill to testify in opposition. I am a Pediatrician and have concerns after reading the bill that the lawmakers of our state could override the public health measures recommended by experts in their field. While I recognize and have had direct witness to the toll on the mental health of my community since March 2020, I propose the cause is the pandemic, not the restrictions put in place in Ohio. If we could work together to get through this pandemic, we would be further along than we currently are in the defeat of COVID19

Thank you for your time
