

Chair Roegner, Vice Chair McColley, Ranking Member Craig, and the honored members of the government oversight and reform committee,

My name is Rachael, and I'm writing this email because I believe the executive powers need to be put in check. The legislature is one place that this should happen. In the past few months, government overreach and a single man have dictated the economic failing of the response to Covid. The shutdown of what he considered to be nonessential businesses and executive demands for individual people violated the human rights to one's own property and actions that do not cause harm to others. No one can dictate that others cannot produce. The data shows a spike in deaths due to depression, separation from others, anxiety, and other causes, not to mention the various other non-death consequences of the executive orders. No person has the right to dictate what everyone else should do. Stand up to the executive powers in defense of the rights of the individual. Please vote YES on SB22!
