

Chair Roegner and the honored members of the government oversight and reform committee,

My name is Susan Kohl and I am a health care professional in Springfield, Ohio. I have seen my patients regress in their level of function when our facility was shut down due to governmental mandates, even though pediatrics are at an extremely low risk for COVID death or complications. **Please vote yes on SB22** allowing individuals to do their own risk assessment and make their own choice.

Susan Kohl, Physical Therapist
