

It is critical that the legislature maintains its role in law creation. When an executive can arbitrarily decide when there is an emergency AND what powers are inherent in the emergency, we have significantly distorted the balance of power.

Finally, while many found the current health orders unconstitutional, harassment was used for compliance. I strongly disagree with the turning of citizen against citizen to achieve such Machiavellian goals.

I strongly urge you to support SB22.

Sincerely,  
Chris Niekamp
