

## Senate Testimony – Spring 2021

Chairman Brenner, Vice chair Blessing, Ranking Member Fedor, and members of the Senate Primary and Secondary Education Committee, thank you for the opportunity to share my testimony about the Fair School Funding Plan in HB110.

My name is Fergus Donnelly and I am from Roxboro Middle School (6<sup>th</sup> grade) and one thing I like about public school is the programs. They have good, diverse programs that teach people a lot of cool things. I would hate to see those go. I like Model UN and band. I like fun playgrounds. I like having fun school things to do with my friends. I know that if my school loses more money a lot of these things will go away. Please fund our schools fairly and make sure everybody can get a good education. Right now the way public schools are funded isn't fair at all. Some schools have lots of great programs and some schools have none. It's not okay. Please change this and support the Fair School Funding Act in HB 110.
