S. R. No. 21

Senators Hackett, Reineke

## A RESOLUTION

To urge the federal government to increase the	1
Pandemic Unemployment Assistance program's	2
security against fraudulent actors, both	3
internationally and domestically.	4

#### BE IT RESOLVED BY THE SENATE OF THE STATE OF OHIO:

WHEREAS, The rate of unemployment fraud is skyrocketing in	5				
Ohio and around the country, and we can no longer afford to					
freely hand out taxpayer dollars without some kind of security					
measures against fraud; and					
WHEREAS, The unemployment compensation system is a federal-	9				
state partnership; and	10				
WHEREAS, Part of the partnership between the federal	11				
government and the State of Ohio is that Ohio will ensure prompt	12				
payment of both state unemployment benefits and benefits under					
the Pandemic Unemployment Assistance program; and	14				
WHEREAS, While we are in an unprecedented pandemic, and	15				
there is great need for expediency when processing unemployment					
claims, there must be some form of security check to prevent	17				
claims from being made in our constituents' names without their	18				
knowledge or consent; and	19				
WHEREAS, The federal attitude of "pay and chase," meaning	20				
the overemphasis on expediting benefit payments without	21				

traditional safeguards, must be re-evaluated and changed; and	22
WHEREAS, Across the country, regardless of whether these	23
fraudulent claims are through states' traditional unemployment	24
systems or the Pandemic Unemployment Assistance program,	25
taxpayer dollars are being siphoned off by domestic criminals	26
and international thieves; and	27
WHEREAS, This fraud deprives our state and federal	28
governments of necessary resources during a pandemic and costs	29
our constituents money; and	30
WHEREAS, This fraud slows down the process by which	31
unemployment benefits are distributed to those who are truly in	32
need within our communities; and	33
WHEREAS, Instituting a system that stamps out fraud and	34
theft will clear the way for resources to flow where they are	35
needed more quickly and efficiently; and	36
