Chairman Kick, Vice-Chair Lear & Ranking Member Rogers:

The Indiana Kentucky Ohio Regional Council of Carpenters (IKORCC) is a trade organization that has over 16,000 members in the state of Ohio.

The IKORCC is a proponent of HB 308. The IKORCC supports all energy sources throughout the state. The hardworking men and women of the IKORCC have been building and maintaining our state's facilities for generations. The IKORCC utilizes our privately funded training program to ready our workforce to service the needs of Ohio utility infrastructure.

We are in favor of energy sources that will not only do good for the environment but will also help the economy of Ohio. Investing in Ohio's energy infrastructure will only stand to help Ohio be a leader in the industry and provide good paying construction jobs at the same time.

HB 308 stands to turn "waste products" into a useable energy source and that on its own is a great way to recognize green-energy in the nuclear energy industry.

Thank you to the Energy and Natural Resources Committee.
