TO: Chair Kick, Vice-Chair Lear, Ranking Member Rogers, and members of the Energy and Natural Resources Committee

RE: Ohio House Bill 308

Ohio House Bill 308 proposes to appoint nuclear energy as green energy. The only thing green about this bill and nuclear energy is the people's tax dollars that you want to use to fund special interests' development of nuclear energy. Nuclear energy is far from green since it creates radioactive waste that lasts forever. Green nuclear energy is an oxymoron, a contradiction in terms. Just saying nuclear energy is green doesn't make it so. Ohio HB 308 is simply another creative attempt (can you say Householder?) to get taxpayer monies into the hands of greedy developers that can't get the funding elsewhere.

I request that you vote NO on Ohio House Bill 308. Thank you.
