Subject: HB 319 written proponent testimony

Please support HB 319 Prohibiting discrimination for medical intervention refusals as it is written.

Coercion to induce compliance to vaccine mandates, or unwanted medical interventions as described in HB 319, violates bodily autonomy, and forces citizens to make choices that may harm them physically, violate their conscience, or otherwise inflicts pain on their persons or possessions. I personally have known young people who experienced heart attack, brain tumor, or loss of fertility, after taking the COVID-19 vaccine. I know of others who died after taking it.

Besides damage to public health, many good doctors and whistleblowers have been punished, lost jobs, or had their licenses revoked.

Please look up Senator Ron Johnson (Wisconsin) Expert Forums

Standing up for this this essential freedom indicates the government of Ohio has a backbone, and is willing to stand up and defend it's citizens and medical professionals from tyranny. Anything short of this is cowardice, and leads to our decline as a state and nation.

Sincerely,

Robert J. Eustace

Beavercreek, Ohio
