Chair Young, Ranking Member Miller, and all honorable members of the House Higher Education Committee, thank you for the opportunity to provide written proponent testimony for H.B. 27. I am a current sophomore at Miami University. I am majoring in public administration and am heavily on campus. Even though I have already been admitted and currently attend, I am still not fully aware of the finances and costs involved with the process of me attending. I am sure I could spend hours of my time waiting on phone calls and meeting in person to try and find this information out but I simply do not have the ability to. A graphic similar to how this bill describes would be easily the most efficient and effective way for me to be able to know exactly what are the specific costs of my education and what my money is being spent on. I am in complete favor of this current legislation and hope that it passes through committee. Thank you for your consideration of this testimony.
