

Dear Committee,

I fully support HB 183 and am asking for you to do the same.

This bill represents a common sense approach and an all inclusive policy for Ohio K-12 schools as well as for Ohio universities.

If we can save just one biological female student, staff or visitor from a sexual assault by a biological male with nefarious intentions, we should.

On average, males are physically stronger than females. Men have 66% more upper body muscle than women, and 50% more lower body muscle.
