

Background/Intro

- Hazmat Chemist
- Decontaminated Ebola, Anthrax, Bird Flu, etc for DOD, major hospitals, major airlines
- Clean up and remediate some of the most hazardous chemicals/infectious diseases
- 3 young children in public schools (elementary age)
- Covid opened my to a disturbing agenda that harms our children.
- Closing schools and wearing masks is now proven to be wrong.
- I spoke to anyone who would listen based on my knowledge of masking, cloth masks don't work for covid, N95/P100's slightly do, its about particle size.
- Covid is an aerosol and too small for cloth masks to block.
- Despite this, our children were harmed physically, emotionally, and educationally.
- The "scientists" were wrong because they ignored the actual science to push an agenda/control/power.
- All school districts were pushing masks and school closings as a result, they were wrong.

Issue

- During my defense to open schools and unmask our children, I learned many more disturbing issues.
 - Videos shown to middle schoolers from teachers and promoting LGBTQIA+ Ideology. One teacher in the video invited kids to LGBTQIA+ meetings.
 - Flyers promoting LGBTQIA+ ideology sent to school emails.
 - Teachers actively promoting and reading books discussing sexuality to children as young as kindergarten, 1st grade.
 - Anyone who watches any news can find this is happening all over the country.
- These are being pushed under the false pretenses of "Diversity, Equity, and Inclusion" when in fact they are promotion.
- When approached, school admin told me "Based upon self-reported information from students or families, 47 middle school students identified themselves as non binary or gender non conforming - thirty of the 47 are 7th graders".

Conclusion

- As with Covid (shutdowns, masking, vaccines, origins) etc, the government and schools are wrong about allowing sexuality based promotion in our schools.
- Kids are highly influential, they cant vote, drink, drive a car, buy a gun, go to an R rate movie, smoke cigarettes, etc, however, we think they understand their sexuality to a certainty?
- As a parent to my children, I am responsible for what they hear and see. They have plenty of time later in life to learn the social battles of today.
- I will teach my children not to hate, but to have principals founded in morality.
- It is not the governments and/or schools role to teach my children highly controversial and scientifically debatable social experiments.
- It is not appropriate to talk to other peoples children about their sexuality.
- This bill is needed to prevent the overreaching power grab to control the minds of our children and restore power to the parent.
