

Lifewise has negatively impacted our state and its students in many ways. Because we are not practicing Christians, my kids are subject to undue questions and ridicule from others. I chose to send my children to a public school instead of private for these reasons.

Also, kids who participate in this program in my children's school district are missing out on valuable specials time (art, music, library). Although my district has already allowed this program, I would like for it to be a CHOICE for other school districts.
