Re: HB 68

---

On behalf of the Ohio State Medical Association (OSMA), the state's oldest and largest professional organization representing Ohio physicians, medical residents, and medical students, we appreciate the opportunity to provide comments regarding House Bill 68, which would prohibit medical professionals in Ohio from providing gender-affirming care to minors.

OSMA supports individualized, gender-affirming, evidence-based treatment and clinical practices in caring for transgender and gender minority patients. Transgender youth are a historically underserved patient population and are increasingly presenting to pediatric offices for care, referrals, and resources. Ohio's children have the best chance to thrive when they are supported and can get the health care they need, and transgender children are no exception. We are concerned that by denying transgender youth evidence-based, best practice medical care, HB 68 creates a hostile environment for young people and their families - as well as for the healthcare professionals from whom they seek guidance and care.

OSMA opposes efforts to ban administration of evidence-based care to patients when determined to be clinically indicated by their physician, including the administration of evidence-based gender-affirming care. Criminalizing or penalizing necessary medical care denies physicians the freedom to practice medicine informed by their years of education, training, clinical experience, as well as the available scientific evidence and research. The physician-patient relationship cannot thrive if both parties are prevented from collaborating and making decisions together about the care that is best for them. Interfering with and damaging this relationship is a risk to patient safety and can lead to negative health outcomes.

OSMA recognizes the unique health care needs of all patients, and advocates for equal rights protections to all patient populations. We are dedicated to assuring that health care is fully inclusive and attainable, so that everyone has access to necessary medical services. Thank you for your consideration of our remarks. As always, we appreciate the opportunity to be meaningful contributors to the legislative process. Please contact us should you have any questions.
