**House Finance Subcommittee on Agriculture,  
Development, and Natural Resources  
Testimony – Prepared by: Fulton County Commissioners Office  
March 14, 2023**

Chair Jones, Ranking Member Troy, and members of the House Finance Subcommittee on Agriculture, Development, and Natural Resources, thank you for the opportunity to provide Interested Party Testimony regarding the state's Main Operating Budget for Fiscal Years 2024 and 2025.

My name is Vond Hall, County Administrator of Fulton County Commissioners (FC). I am submitting written testimony on behalf of the Fulton County Commissioners.

Recognizing the challenge presented to Ohio by the presence of brownfields, the FY22-23 main operating budget established the Brownfield Remediation Fund (BRF), providing \$350 million to assess and cleanup these environmentally contaminated sites. We commend the Legislature for the inclusion of this program, and the Ohio Department of Development in its administration of this successful program.

The Brownfield Remediation Fund's \$350 million provided grants to 313 projects in 83 of Ohio's 88 counties. While this is a significant investment in the assessment and cleanup of brownfields, the need remains for grant dollars to remediate and redevelop these blighted brownfields into productive use.

The as-introduced budget does not include funding for the Brownfield Remediation Fund, and therefore, **we are writing to encourage the committee to provide an additional \$350 million to this program in the FY24-25 budget.**

Fulton County has two brownfield properties on the list of 125 projects that were granted assessment dollars. Jackson Cleaners and Bunting Bearings both received much needed assessment dollars. We were preparing for a Round 3 funding submittal for the deadline of September 30, 2022 but the grant closed three days after it was opened and thus our redevelopment project was sidelined. Without additional funding, our large redevelopment project will likely remain contaminated unless we can win the USEPA remediation grant lottery this fall. Adding to the concern, while working on these assessment projects, we identified more brownfields in Fulton County including another dry cleaner that need assessment and cleanup dollars. Please assist us in the vital role of promoting revitalization, renewal, and community pride.

**I am writing to encourage members of the House Finance Committee to include this in the budget.** An investment in a brownfield grant program is an economic win for the state, and the communities where remediation occurs. Past research by the Greater Ohio Policy Center shows that for every dollar the state invests, there is a five dollar return in private investment. Ohio's previous brownfield grant program contributed more than one billion dollars to the state's GDP during its tenure.

Chair Jones, Ranking Member Troy, and members of the House Finance Committee, thank you for your time and attention to this important issue. I am happy to answer any questions you may have.

Very truly yours,

Board of Fulton County Commissioners
