Healthy families are the foundation of our society. Financial burden is a significant source of strain on families that can lead to poorer social, academic, and health outcomes for children. According to the US Census Bureau, 13.4% of families in Ohio are impoverished. The average cost of diapers per year is \$900 per year. If HB118 is enacted, the average family would save about \$63 per year on diapers alone. For families in our great state of Ohio, every penny counts. Please vote to support HB118.
