

### Witness Testimony in opposition to SB293

I am writing this statement today to declare my support in opposition of SB293 and believe all decisions about release time for religious instruction should remain a local decision with each school board.

As a parent that has a child with ADHD and Anxiety, having any disruption to the school day will cause unnecessary distractions. My child thrives on having a routine and with other children leaving and coming back will ultimately cause my child to be distracted during school hours.

Religious instruction absolutely must remain a local decision with the school boards as they know their districts the best and what is best for their students.
