

This bill further enacts our society's denial of the rights of children. It is a madatory outing of queer and trans children thinly veiled as a "bill of rights". If truly concerned for the safety and wellbeing, emotional and physical, of children and young teens, you would not subject them to the potential dangers of forced outings to their families, including physical and verbal abuse, restricted privacy, social isolation, and suicidal ideation. It is clear: the safety of these children are not your priority. Because if it was, you would look at the recommendations of many doctors, psychologists, and social workers and you would see the statistics showing that the suicide rates of trans kids increase with laws such as this and you would abhor with the blood on your handss. And despite your efforts, trans kids will not stop being trans.
