

December 7, 2024

To: Chair Reineke, Vice Chair McColley, Ranking Member Smith, and Members of the Senate Energy and Public Utilities Committee,

Re: Ohio HB 308

Witness Testimony

I am opposed to **OHIO HB 308**. Nuclear power is very dangerous and very expensive. The risks are too great. Accidents happen and radioactivity is dangerous forever. In addition, the costs will be enormous for taxpayers. New nuclear power will take 10-20 years to create, if ever. The cost and the danger is way too high.

Please, please, **do not pass this bill**.

Thank you,

Janet McLaughlin
