

My name is Robert McClure, and I am the owner of Sunmed | Your CBD Store located in Centerville and Deerfield Township, Ohio. My business has proudly served our community since October of 2019, providing high-quality, hemp-derived wellness products that improve lives while contributing to the local economy.

This bill, which proposes THC limits of 0.5mg per serving and 2.0mg per container, would devastate my business and others like it across Ohio. These limits are arbitrary, not based on scientific evidence, and do not align with the 30-day supply format that dietary supplements traditionally follow. If enacted, these restrictions would eliminate 90% of the Full Spectrum hemp products we offer, forcing consumers to turn to unregulated, potentially unsafe online sources and driving significant tax revenue out of Ohio.

Our state can adopt more balanced approaches to address concerns about intoxicating hemp products without crippling an entire industry. Measures like implementing an age restriction of 21+, mandating childproof packaging, and establishing reasonable THC milligram limits would protect public safety while allowing small businesses to thrive.

As a business owner, I am committed to providing safe, rigorously tested products that support the well-being of my customers and my community. My store complies with all state and federal regulations, ensuring that the products we sell are safe, effective, and responsibly marketed.

Senate Bill 326 prioritizes prohibition over progress. This approach would harm small businesses, hurt consumers, and dismantle a growing industry that contributes to Ohio's economy. I urge this committee to reject SB 326 and work toward solutions that balance safety, consumer access, and economic growth.

Thank you for your time and consideration. I am happy to answer any questions or provide additional information at your convenience.
