

The WHO wants to be able to require vaccines, tracking, medical exams, & to censor public speech RE: risky research, vaccines, lockdowns, & quarantines. HB 73 is a critical step towards protecting Ohio residents from harmful intrusive interference and mandates from this international organization. The Censorship and extortion of MD & RPhs, or any OTHER healthcare workers who had wanted to prescribe & dispense medications per patients' right to try -vs- submitting to the unknowns of the various, so called EUA "vaccines" AND the sequelae from said jabs that have neither been sufficiently documented, nor prosecuted, MUST STOP! There must never again be a mandate to take medication at the Public, nor private sector level: schools, businesses, military, government jobs...the VAERS reports that have been submitted are quite telling. The rest that tout the benefit of these injections only NOW having been studied (those gazillions of lab rats now suffering or dead, WERE the retrospective "study" & the whole thing was a crime scene against humanity, ALA: Mengele ... not a drop of "informed consent" ... "vaccine" was redefined in real time, HCQ & IVM were disavowed & dispensing either was at the risk of license suspension/career ending intimidation & threat & individual rights and freedoms were tossed out the window for the MD/Patient diad. American sovereignty MUST be protected & legislation should solidify that at both state & federal levels. I've often contacted Balderson, Brown, & Vance RE: protecting us against JOE BIDEN's propensity to cede our sovereignty to the WHO/WEF/et al, as well as these illegal migrants who have NOT been screened & micromanaged as have the American populace. Although I fear what else might be buried within this ridiculous 200+ pg bill, I'm trusting legitimate advocate groups who've endorsed it, and I ask you to please protect America when Joe Biden & his tyrannical cabal refuse to do so. Me and many other critical thinking family & fellow Americans have not caved to take this illicit MRNA poisonous experiment, and sadly, many will not discover what harms it has imposed upon them personally for days, months or years to come. "SCIENCE" was bought, paid for, and FAILED US globally! DO NOT ALLOW AMERICA to slide into the GLOBALIST, NEW WORLD ORDER EVER AGAIN! Ivermectin, HCQ & a host of other FDA approved meds w/ high safety profiles have saved several of my own elderly family members and the testimonials do not stop there! The more jabs, the more likely folk were to get CV multiple times & suffer from the JAB'S treacherous fallout, long and short term. Thank GOD for the brave medical people who did NOT betray their Hippocratic Oaths...too many to name...at the risk of job loss, inability to feed, house & clothe their families, & the relentless specter of financial ruin that loomed large with their public persecution. "Misinformation" DID not come from that subgroup of actual medical professionals and those from whom licenses were stripped or suspended, and whose credentials were slandered should receive PUBLIC apologies & restitution.

ALL IT TAKES FOR EVIL TO PREVAIL IS FOR GOOD MEN TO DO NOTHING.

DO NOT DO NOTHING! Support this bill!
