Subject: HB 73 written only testimony

It is imperative that HB73 passes for the following reasons:

1. Protects medical free speech by prohibiting any licensing board or state board from penalizing a health care provider for expressing their medical opinion; and
2. Prohibits the World Health Organization (WHO) from having jurisdiction in Ohio.

I am a firm believer that if the WHO gains jurisdiction over the USA and Ohio that our freedoms will be lost forever with regard to the following:

1. Informed Consent, because vaccination can and has in fact resulted to injury and death of people forced to take the Covid-19 “vaccine”. We the people should have the choice whether we put our life on the line for a EXPERIMENTAL DRUG OR ANY OTHER DRUG OR VACCINE FOR THAT MATTER.
2. Rights of individuals must come first, as we learned from the Nuremberg Code, when human beings are being used for medical research. The Nuremberg Code was followed by the passage in 1964 of the Helsinki Declarations by the World Medical Association that emphasizes the human right to voluntary informed consent to participate in medical research that may or may not benefit the individual patient, science, or humanity. WE MUST NOT GO BACKWARDS!!
3. Ethical traditions protect Judeo-Christian freedom of conscience. The Judeo-Christian tradition protects the right of the individual to exercise freedom of conscience even if it conflicts with a secular law of the state. **State law does not trump God’s law.**
