

Chairman Huffman, Vice Chair Johnson, and Members of the Senate Health Committee, thank you for hearing my support testimony for HB 73, The Dave & Angie Patient and Health Provider Protection Act

If a person in the hospital wants treated by a drug, they should be allowed. There are so many protocols and drugs that doctors don't have time to research but many other doctors may know about. Many drugs or protocols were censored in 2020 that could be used. We should be allowed to use other drugs or holistic practices to treat in hospital or as outpatient.

I was appalled in 2020 that Governor DeWine was advocating to not allow pharmacies to sell or give out Hydroxychloroquine. From my research of doctors testimonies of using Hydroxychloroquine along with 2 other drugs that worked to help illness and death. Also, when Ivermectin was announced, this was a censored drug as well. I feel that if these medicines are on the open market, they should be allowed to be prescribed. Just as Holistic methods can be purchased for ailments. We need to have freedom for treatment choices for ourselves and loved ones. We could have saved my father-in-law if drugs were not censored and held back from society; which is another story or bill needed. We are in the fight of our lives so please step up!

The reason we these helpful remedies needed to be censored and slammed for effectiveness was due to a vaccine could not be distributed if there were cures. Let's not repeat this. As we have found out this was gene therapy unleashed on us. This is serious although unbelievable by many. Hopefully everyone else is waking up to what is really going on. We need to protect ourselves from the WHO of which should not dictate what we administer in our country or have power over Ohio and the USA.

Those figureheads along with the New World Order that want to decimate US to be submissive like all countries that follow along. We need to be the beacon of FREEDOM that they want to oppress.

Protect our access to life saving drugs prescribed by doctors from outpatient pharmacies and when in the hospital.

Prohibit licensing boards from taking action against the your health provider if they speak out about drug or vaccine risks or suggest alternative treatment options.

Prohibit the W.H.O. from having any "jurisdiction in Ohio".

I urge the committee to vote YES on HB 73 *****with ALL of the provisions intact.
