RE: I-77 Hwy Dedication to the American Gold Star Mothers & Families-Senate Bill 141

To Whom It May Concern!

Good Afternoon!

My name is Kelly Jackson, Co-owner of Indian River Pioneer Farms & Co-Founder of Indian River Food Policy Council; here in Vero Beach, Florida!

I had the pleasure of meeting Ms. Theresa Christian many years ago here in Florida. What she represents is exactly what this road dedication to the American Gold Star Mothers & Families represents! (I hope to marry this to the road we live off of!) She sees no boundaries in connecting people/resources no matter of their individualities. She is where the “rubber meets the road”. She represents the group as a whole with great dignity and wants to “pave” the way to freedom in this great country!

Quite often we are fighting in other countries. We now have great battles ahead in our own. It is time the people come together (public and private) no matter where you live/work in your respective communities to serve as stewards to the natural resources that we all share! We all have the right to clean air, food & water! Our natural resources (when supported as nature intended) provides the highest & best solutions that we are designed to have! It is our birthright!

Good Luck Tessah! Thank you for your service!

Sincerely,

Kelly

We are Nature. We are a part of the Ecosystem. We are not divided (only if we allow it).
