**A R E S O L U T I O N**

To express support for consumer choice in the 1  
automotive marketplace and against government- 2  
preferred vehicle technology mandates that will 3  
harm Ohio's consumers by prematurely requiring 4  
the transition of the automotive fleet from 5  
internal combustion powered vehicles to all- 6  
electric vehicles. 7

**BE IT RESOLVED BY THE HOUSE OF REPRESENTATIVES OF THE STATE OF OHIO:**

WHEREAS, All Ohio residents deserve access to affordable, 8  
practical, and technologically neutral options for 9  
transportation in the new and used motor vehicle marketplace; 10  
and 11

WHEREAS, An overwhelming majority of Ohioans have chosen to 12  
purchase vehicles equipped with an internal combustion engine; 13  
and 14

WHEREAS, The median household income of Ohioans from 2017- 15  
2021 was \$61,938 as determined by the U.S. Census Bureau; and 16

WHEREAS, The average cost of a new all-electric vehicle is 17  
more than \$58,000, making the mandated purchase of these 18  
vehicles unaffordable and, thus, unattainable for the majority 19

of Ohioans; and 20

WHEREAS, 198,000 Ohioans are employed in the automotive 21  
sector, which contributes over \$12.1 billion in labor income to 22  
the state's economy; and 23

WHEREAS, The CEO of Ford stated that manufacturing electric 24  
vehicles requires approximately 40% less labor than internal 25  
combustion engine powered automobiles. Therefore, thousands of 26  
family-sustaining union jobs are at risk; and 27

WHEREAS, PJM, the regional transmission organization that 28  
coordinates the movement of wholesale electricity in all or 29  
parts of 13 states and the District of Columbia has warned that 30  
40 GW of existing electric generation are at risk of retirement 31  
by 2030; and 32

WHEREAS, According to the U.S. Geological Survey's 33  
assessment of critical minerals, the United States depends on 34  
countries that have poor environmental records and antagonistic 35  
relations, like China, for many of the minerals necessary for 36  
deployment of all-electric vehicles; and 37

WHEREAS, Federal and state regulators have failed to 38  
adequately consider the cost impact to vulnerable communities, 39  
the displacement of American jobs, the capacity of our electric 40  
infrastructure, and our ability to bring supply chains governed 41  
by hostile-actors to America when encouraging vehicle mandates; 42  
now therefore be it 43

RESOLVED, That we, the members of the House of 44  
Representatives of the 135th General Assembly of the State of 45  
Ohio reaffirm the State of Ohio's commitment to consumer choice 46  
in the automotive marketplace by neither mandating nor 47  
prohibiting the purchase of specific vehicle technologies; and 48  
be it further 49

RESOLVED, That we respectfully urge the Biden 50

Administration to ensure all regulations being promulgated by 51  
the U.S. EPA regarding light-, medium-, and heavy-duty vehicles 52  
protect American families and workers by being both economically 53  
practicable and technologically feasible, which means preventing 54  
direct or indirect electric vehicle mandates; and be it further 55

RESOLVED, That the Clerk of the House of Representatives 56  
transmit duly authenticated copies of this resolution to the 57  
President of the United States, the Secretary of the U.S. 58  
Department of Energy, the Secretary of the U.S. Environmental 59  
Protection Agency, the Speaker and Clerk of the United States 60  
House of Representatives, the President Pro Tempore and 61  
Secretary of the United States Senate, the members of the Ohio 62  
Congressional Delegation, and the news media of Ohio. 63
