

Lora Romney – Patient Testimony

I am sharing my story with you today so that you can understand the human side of kratom and how your decision will impact the lives of thousands who rely on this botanical. I am a very normal 55-year-old wife, mother, grandma, and conservative voice. At 42 years old I joined the ranks of the chronic pain community with my diagnosis. I feel compelled to explain to you how natural kratom has changed my life and allowed me to function. I also feel it is extremely important to stress that natural kratom is very different from synthetic 7-OH. I know that protecting your citizens is your entire goal. By banning 7-OH you are ensuring that the problem synthetic products are off your shelves. By regulating kratom, you are allowing safe access for those who rely on kratom.

I am a patient with Atypical Trigeminal Neuralgia (ATN). This disease causes severe facial nerve pain that never stops. It presents in my sinus regions on both sides. Imagine an ice cream headache that never goes away. This is what I experience daily. This disease is called “the suicide disease” because it can be one of the most painful conditions to live with.

I have been struggling with ATN for the past 13 years. I have tried everything to control my pain: brain surgery, a nerve stimulator implant in my face, blocks, lidocaine infusions, chiropractic, acupuncture, physical therapy and over 30+ medications to try and decrease this pain. I was referred to a pain clinic after my neurologist exhausted all options for me. Under the care of a pain physician, I was given two oxycodone per day.

This dose of oxycodone was not enough to control my excruciating pain. It gave me relief for approximately 4-5 hours. This meant that for 16 hours of the day and night, I did not have any pain control. I suffered immensely. Since I had tried all available options to control this pain, I began looking at alternative solutions. I heard about the plant kratom that many were using successfully to help control their TN pain. I decided to try it. Amazingly enough, I got instant relief. My pain did not go away, but it moved from an 8-9 to a 2-4 with the use of a low dose of kratom. I still have very bad days where nothing really helps, but the majority of the time, I can function very well. I am an 8-year kratom consumer. Kratom has allowed me to discontinue my daily opioid prescription!

Patients like me need pain control options. I read stories every day of patients who are being forced off their pain medication and given no other options. While taking acetaminophen or ibuprofen for pain control works for some, when people have severe illness and pain, these over-the-counter meds do not help. What is not understood by many lawmakers and physicians is that you cannot survive at constant 8-10 level pain for an extended period of time without snapping. Mentally this amount of pain changes your brain, and suicide becomes a real option. We don't want to die. We want to live! I don't take kratom to get any sort of a high. In fact, the reason I love kratom is that it makes me feel more normal! There is no physical craving for this supplement. The only craving I have is the desire to have my pain drop a few points.

Pain patients are the silent minority in this country. We are the ones who have no voice. We are hidden away in our homes, unable to work, go to lunch, and even drive a car at times. All we are asking for is compassion and access to medication and natural supplements that give us some quality of life. Sometimes I lay awake at night thinking about the real possibility that kratom could become illegal. What would I then do for pain control? That is a thought that haunts me. Opioids are no longer

available to most patients. I could not live at level 9-10 which is what I would be at without pain control. The answer for me was Kratom. I am grateful every day that it is legal and that I have the option to use this supplement.

Just this week I came across this post. It perfectly summarizes the terrifying position that pain patients are being put in by having their access to pain medication taken away. Notice the last two sentences. It says it all.

Please give pain patients a voice! Regulate kratom instead of banning it! Currently the adverse events being reported are most frequently coming from 7-Hydroxymitragynine (7-OH) synthetic products and not from pure kratom. 7-OH products SHOULD be banned since they are not kratom. Please do not assume that these products are the same. 7-OH is NOT kratom.

By regulating and not banning kratom, you are showing those that rely on kratom to treat their pain, anxiety and even drug withdrawals with kratom truly matter. You have the power to keep us functioning so we can give back to society and take care of our families. Thank you!
