

I'm a single father who suffers from extreme anxiety. I've taken kratom responsibly for 10 years now. I'm a hard worker and tax payer here in this state. Banning kratom is not only going to affect me but so many others who are responsible with it. Banning it would be like banning anything that's dangerous when abused. Such as alcohol, guns, and even over the counter medicine. Putting regulation on it is something I'm for. Also taking synthetic kratom out I was also for. I love this state and living here. There are so many I've met who use kratom responsibly in this state and its going to cause them to loose faith in our elected officials when it comes to these matters. So please take us into consideration. I hope you all make the right decision.
