

I would like that the funding not be cut in half. Our schools have underprivileged kids that need the services we provide, chromebooks, up to date teacher material and the education that comes with our teachers. They do not have money to pay for the necessities that will be cut by Mayor Mike Dewine. He will be cutting a lot of resources that we will be using that money for and if he cuts it he will be lying to the homeowners that still are under the impression it's helping our schools when it is not. Some of these students have issues with learning and if we had our resources taken away how will we be able to help every child. Our kids already struggle everyday to come to school and eat two meals a day, how can we do this to the students that need help with learning and resources that the money would help us with. Please don't cut our funding we really need it for our babies.
