

HJR 2 Proponent Testimony of Tracey Moreland

Massillon, Ohio 44646-8382

My name is Tracey Moreland, and I live in Representative Reggie Stoltzfus' District, number 50. I have signed the COS petition to enact Article V of the Constitution, in desperate hopes to create positive change desperately needed, to reel in the federal government, and its representatives. I believe we must create fiscal responsibility, stop governmental overreach, and create acceptable term limits for all elected officials.

As one of your constituents, I am watching the United States become a place I no longer recognize. Where our borders are overrun with illegal aliens that are not and have not been vetted. They enter this country and access benefits that even our own citizens and veterans cannot attain, as well as kill, rape, and rob our citizens. I constantly see rising crime in all our big cities raging out of control. Elected officials who seem to subvert the law, only to allow criminals to be set free and continue to propagate the same or new crimes, never to be fully prosecuted to the letter of the law.

I have been working in my country for 37 years. I worked my way from the bottom up, in a plating company for 27 years, creating a great work record to be proud of. I decided at 54 to continue my education in order to redesign my career. I have volunteered along my journey in different venues. When my peers or young Americans are watching and I don't know it, they see me doing the right thing. I can hold my head high and look people in the eye. Can our federal representative do that? When I vote for a representative in office, I do expect to be represented properly and for my leader to be a great role model. I am not seeing this, and it disturbs me.

I am writing to you again, in hopes that you stand with the Convention of States and myself, to stop the madness and save our country. Leave behind a legacy that you voted to save our country from tyranny.

Respectfully,

Tracey Moreland
