

I am vehemently opposed to this bill. As a retired teacher of 27 years, I have witnessed countless numbers of children who desperately need counseling but would never receive it do adult abuse of these children. Parents/Caregivers do not want their atrocities to be shared with others. These parents would never consent to therapy for thi child(ren) who need it most.

In light of what is currently in the news about the Epstein files, it is clear that minors need protection.
