

Testimony Opposing House Bill 324– Places restrictions on medications that are deemed dangerous

Dear Elected Officials:

As a constituent of Ohio, a Clinical Social Worker, and an Educator, I am urging you to reject HB 324 “Places restrictions on medications that are deemed dangerous”. The legislature should not pretend to be doctors nor impose on the FDA.

Once again legislation is being proposed that micromanages a field that is not represented in the legislative body. This bill is dangerous and harmful and needs to be rejected.

Thank you,

Ri Molnar, MSW, LISW-S
