

there was a false allegation that my children had tested positive for a substance that they did not actually in fact having their system each of their results were negative And I was also told this while at children's hospital waiting for discharge papers for us to be able to leave. I was never notified that children's services have been contacted and I was also under the impression that we were getting ready to be able to leave after being held in the hospital for 14 hours prior to my children being removed. I was a victim of A sexual assault on January 31 by a man named John Harris Junior, who is now deceased as of February of this year. The police fabricated an allegation that my son ingested a bunch of marijuana in their presence which they observed him to have done , which is also stated in the court adjudication document. The SS leading up to my children being removed as it was a lead in my son had ingested marijuana took place 3 AM If I'm not mistaken, I had a call from an officer at 3:33 AM February 2 Which I had left my home in order to get a rape kit done February 1 and was transported by the police dispatch who authorized an ambulatory Transport to University Of Cincinnati medical Center. That is when I was contacted while waiting to get a rape kit done and being assessed for my sexual assault that my children we're being transported to Cincinnati Children's Hospital without my consent and also without the name of the officer that would be transporting, nor was there a children's service worker present to give any consent for treatment or oversee the children being removed from my care. The documentation shows that the case was open under Foes pretenses that there were officers who lied under oath and they are not names and the clinical notes from Children's Hospital. Also, the officers were not from Cincinnati Police Department. They were in fact officers from the Hamilton County sheriffs department or the Addyston Police Department, which is now been defunded After my children were already removed due to them, not having adequate equipment in order to service our community I live in Addyston Township Cincinnati. Police Department does not come out here as it is outside of the jurisdiction. That also shows that the documentation that was reported by Children's Hospital was also false, which is why I'm addressing this and Bill 172. Children's has now placed my son, my king Perry on medication without my consent when I remove, refused him to be on the medication I was in placed under a court order in order to have the medication still a minute administered against my consent. I refuse to consent for the treatment to be administered while they were in custody of Hamilton County Job And Family Services, due to previous allegations and concerns regarding Miss Kelly Lewis, their former foster parent, who As of November 6 Charged with Neglect and abuse of a disabled person. My sons were not removed from her care until October 22 of this year and the year 2025. Previously, at the time of their remover, they were immediately placed under Miss Kelly Lewis's Care Until they were removed this year. This is also proof of retaliation as I am currently fighting for unification of my children, but being threatened

with the possibility of my children being permanently removed And emotion is being currently filed for PC to be overturned to Job And Family Services in Hamilton county.
