

Hello,

I am writing to you too share what my husband and I witnessed at a local Pride event we attended in 2023. We only attended because we wanted to see for ourselves the ungodly things that were taking place in the name of "family friendly" event.

We did not go in but watched outside the perimeter as people were entering. This was an outside event so you visibility easy.

We witnessed a women wearing jeans, a pride flag as a cape and large band-aids covering her nipples. When asked a policemen why she was not arrested for indecent exposure, he started that as long as her nipples were covered she was good. This was appalling to us!!

We also witnessed both men and women scantily dressed, worse then in a public beach. Men dressed as women put a sign up on the women's restroom stating that it was for Trans. Women didn't feel safe gong into Their bathroom.

I hope this helps in some way.

Thank you,

Elissa Zornes
