

Drag is protected speech under the first amendment. Allowing the government to decide what constitutes gender non-conformity or what constitutes a gender expression not aligned with sex at birth is a massive overreach in government power. This will only silence people's right to choose and will not protect any children. Children are not harmed by seeing drag, but repressing drag culture will be harmful to everyone. This bill is a tyrannical government's dream, with the amount of power it hands to the state to surveil its citizens.
