

Consider SB219. This bill only promotes the agenda of fracking companies, making it easier and quicker to get fracking licenses with less time for valid opposition. And it would allow fracking licenses to be extended for extra years with no constraints. It would drastically limit oversight by the ODNR. It would eliminate local government requirements. You were elected to do what is best for the people of Ohio AND our environment. I and so many others frequently use our state parks and public lands; these lands were set aside for that purpose, not for a site of hazardous chemicals. Be better! Say No to SB219.
