

Fred Audritsh Proponent Testimony

As the zoning inspector for five rural townships in Sandusky County as well as being the president of the Regional Planning Commission, I'm constantly being questioned regarding data centers. It seems that there are opposing answers to every question and this creates issues when trying to educate people not only on the different boards but the general public as well.

I feel that H.B.646 needs to pass but should be fast tracked. I further believe that the commission needs to be made up of a very diverse group of people to be able to get a more complete picture. The situation in Sandusky County is different than New Albany for example and things are handled differently due to the demographics Thank you for listening to my thoughts.

Respectfully Submitted
