February 16, 2026

Dear Agriculture and Natural Resource committee:

Thank you for the opportunity to comment on SB 329. I am a farm kid and a homeschool student in Conneaut, Ohio. We raise sheep, goats, vegetables, blueberries, and chestnuts. If we have brine in our water system, that could make the animals sick. I am also concerned that the water will be taken up by the plants we raise. we are trying to raise the healthiest food possible.

One of my favorite things is swimming at the lake

Scanned with CamScanner

and playing in the conneaut creek. I also enjoy eating fresh fish such as lake Erie perch.

Please support SB 329 so we can grow and eat healthy food and enjoy our lake ant. our creeks.

sincerely,
chase Barton turner, age 11
