How much time will your testimony require?

Please provide a brief statement on your position: This bill while presented as a nice idea of "clean energy" does not promote truly clean energies like wind, solar, and water. It is twisting the words of clean energy to sound good when it is not. We are in 2026, we have seen the studies on what happens if we don't care for the planet, and we want better future. That means funding and using better sources for energy. Many other countries have already found ways to be renewable. It's not even a matter of research but simply implementing those practices here that will lead to a better future for

everyone. Please consider the quality of the community, planet and its inhabitants and remember you cannot eat money.

Thank you for taking this testimony.

Please be advised that this form and any materials (written or otherwise) submitted or presented to this committee are records that may be requested by the public and may be published online.
