Ohio Senators:

Do not enact senate Bill 294 since it makes possible dangerous and unwise polluting gas projects!

Ohio needs affordable solar and wind energy to survive.

Natural gas was wrongly labeled "clean" and has resulted in much more polluting methane in the atmosphere.

Senate bill 294 wrongly labels fracked gas as "clean," despite the fracking process releasing methane that is 20 times more potent than carbon dioxide.

Help the citizens of Ohio and stop this bill.

Thank you,
Lynn Anderson
