

What do you think Ohio will look like in the next 10 or 20 years if HB 96 is passed? Without fairly-funded public schools, we'll see decreasing test scores, teachers leaving in droves, and families moving to other states with better schools. When young people graduate from our high schools, they'll look for colleges outside of Ohio due to the strict provisions in SB1. When young people leave the state, the talent pool for businesses in our state will diminish, and companies throughout the state will struggle to find quality people to hire. With cuts to Medicaid, we'll see children & adults with disabilities who suffer because they can't afford health care. Cuts to SNAP will further harm many children and families. If the Public Library Fund isn't funded with a set percentage, libraries across the state will be forced to make cuts & possibly close. What kind of society isn't interested in providing residents with access to books, computers & so many other resources, but is ready to hand over \$600M to a football team?

It's the kind of society and state that aims to award the wealthy with an income tax break by taking away so much from so many Ohioans. Whether it's failing to fully fund our public schools - where the majority of Ohio children are enrolled - or causing harm to the most vulnerable Ohioans who rely on Medicaid to survive, HB 96 will be detrimental to the majority of Ohioans. All of you were elected by citizens who trusted that you had their best interest in mind. This budget harms more Ohioans than it helps. Please do better!
