Proponent Testimony for SB 86

I read the proposed law and agree that regulation is necessary for safety. I voted against this ballot initiative and now have to live with the results of the naïve voters. This is the best outcome of a bad decision.

Cigarettes and alcohol have warning labels on them. I do not know how effective the labels are but at least they are on there. It would be amazing if someone got the bright idea to sue over no warning label if they got injured or hurt by drinking some of this foul stuff by stating "there was no warning label" like cigarettes or alcohol. Just mentioning it as I did not see it on the proposal.

Thanks,

Sharon
