

NO on SB.153

The inclusion of even more needless requirements to enact ballot initiatives is another brick in wall to silence voters, intimidate petition organizers & signers, and those looking to improve our communities through the democratic process.

when states implement proof of citizenship requirements, eligible voters are impacted, just follow the disaster of events that unfolded with Kansas voters when the State of Kansas tried the same thing.

This Bill is unnecessary, and only aims to make voting less accessible, and harder, not more accessible for the members of our community.

In short, NO on SB.153.
