

As a member of the LWV of Ohio most of my work has been in voter registration and education. I and my colleagues work tirelessly to reach new voters and educate them about the voting process. We encourage folks to check their voter registration status and update as necessary. We can't make Ohio voters vote but we can and do get them registered. We are non partisan.

With the abysmal voter turnout that we have in Ohio I find it ironic that you, our state legislators, want to make voter registration even more difficult. Everyone would understand if we saw widespread voter fraud. If that was the impetus I would be on board as I believe in "One person one vote."

Early voting and ballot drop off boxes have made it easier for people to cast their ballot.

Why do you legislators want to make the whole process more difficult? Why would you take steps to kick eligible votes off? You may need those votes. Vote NO on SB 153.
