

As a volunteer for a non partisan organization, Northeast Ohio Voter Advocates, I encouraged voter participation from people who were receiving benefits from the Human Services Building in downtown Cleveland. Many of these voters had significant physical disabilities making it difficult for them to even get to the floor where they could get their business done. I learned that these people were not of a single political party when they would register to vote in primaries. Many of them would need to use the mail in ballot option to vote.

It is not fair that these citizens votes will not be counted because of how ever long it takes the post office to deliver their ballots to the Board of Elections if SB 293 is passed.

Please take a stand for fairness and citizen participation in governance.
