

To Whom it May Concern,

As a practicing Sleep Medicine Physician for nearly 30 years, I strongly recommend:

No on SCR 6. Restore Permanent Standard Time instead.

Going to permanent Daylight Savings Time is not in-line with our internal clocks and will be harmful to individuals.

Eric Yeh, MD

Attending Physician
Assistant Professor, CWRU School of Medicine
Associate Program Director, Sleep Medicine Fellowship, CWRU School of Medicine
Director of clinical operations and quality improvement, Sleep Medicine, University
Hospitals
Provider Informaticist, University Hospitals
